LICENSEE: Indiana Michigan Power Company

FACILITY: Donald C. Cook Nuclear Plant, Units 1 and 2

SUBJECT: SUMMARY OF PUBLIC DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT MEETING TO SUPPORT REVIEW OF THE DONALD C. COOK NUCLEAR PLANT, UNITS 1 AND 2, LICENSE RENEWAL APPLICATION (TAC NOS. MC1221 AND MC1222)

On Tuesday, November 9, 2004, members of the U.S. Nuclear Regulatory Commission (NRC) staff held public meetings in Bridgman, Michigan, concerning the staff's environmental review of the application submitted by Indiana Michigan Power Company (I&M), a wholly-owned subsidiary of American Electric Power (AEP), for renewal of the operating licenses of Donald C. Cook Nuclear Plant, Units 1 and 2 (CNP). The purpose of these meetings was to provide the public with opportunities to comment on the draft supplemental environmental impact statement (DSEIS) which was issued in September 2004. The public meetings were conducted in the afternoon and evening on Tuesday, November 9, 2004, at Lake Charter Township Hall, in Bridgman, Michigan. Afternoon and evening sessions were held to allow maximum public participation. Formal presentations were made by the NRC staff and the Argonne National Laboratory (ANL) staff.

The DSEIS is a plant-specific supplement for CNP to the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants" (NUREG-1437). The NRC staff described the overall license renewal process, provided a description of the National Environmental Policy Act of 1969 review process, and discussed the environmental requirements outlined in Title 10 Code of the *Federal Regulations* Part 51 (10 CFR Part 51), while staff from ANL described the preliminary results of the environmental review analyses. The staff concluded that the environmental impacts of continued operation would be small. The impacts of alternatives (including the no-action alternative) were predicted to each moderate or large significance in at least some environmental aspects.

After formal presentations were given by the NRC environmental review team staff, members of the public were invited to provide comments. Approximately 40 people attended both meetings, including members of the public, representatives of the NRC environmental review team, I&M, the news media, and Federal, State and local government officials; and 11 people presented comments.

In an effort to improve communication and increase interaction with members of the public, the NRC staff hosted an open house one hour before each meeting and encouraged the public to submit meeting feedback forms. During the open house, the staff provided displays and brochures and were available to meet with members of the public to answer questions about the proposed renewal of the CNP operating licenses. Enclosure 1 is a list of meeting attendees. Enclosure 2 is the handout and meeting agenda distributed at both meetings.

Enclosure 3 contains the Official Corrected Transcripts for each meeting. The slides (Enclosure 4) used in both NRC presentations are also available on the NRC's Website at www.nrc.gov/reading-rm.html in the electronic reading room, through the Agencywide Documents Access and Management System (ADAMS) (Note: Public access to ADAMS has been temporarily suspended so that security reviews of publicly available documents may be performed and potentially sensitive information removed. Please check the NRC Website for updates on the resumption of ADAMS access). The NRC staff accepted comments on the CNP DSEIS until the end of the comment period on December 8, 2004. The staff will consider all comments and make any necessary revisions prior to issuing its final supplemental environmental impact statement, scheduled for May 2005.

**Welcome to the NRC's Open House
Associated with the Environmental Review for the Proposed
License Renewal at D.C. Cook Nuclear Plant Units 1 and 2**

This open house is intended to provide an opportunity for interested members of the public and staff from other Federal, State, and local agencies to interact with the NRC staff in an informal information exchange.

Please note that if you wish to provide formal comments regarding the draft D.C. Cook Nuclear Plant Units 1 and 2-specific supplement to the Generic Environmental Impact Statement (GEIS) for License Renewal, they must be presented at today's transcribed public meeting, or provided in writing or by e-mail by December 8, 2004. Comments received after this date will be considered if it is practical to do so, but the NRC staff is able to assure consideration only for comments received on or before this date. Written comments on the draft supplement to the GEIS should be sent to:

Chief, Rules and Directives Branch
Division of Administrative Services
Office of Administration
Mailstop T-6D 59
U.S. Nuclear Regulatory Commission
